

CiscoSans Font Installation Guide

Replace all CiscoSans fonts installed prior to April 26.

Get it here

Before you install your new fonts:

- Uninstall all old versions of CiscoSans.
- Close all open applications.

The new font package contains different versions of CiscoSans for different needs.

- TrueType font is used for most applications including collateral, presentations, and emails. Everyone at Cisco should have this new CiscoSans TrueType installed.
- The web font set is used for digital applications and web pages.
- The localization font set is used for regions and translations.
- The condensed font set should only be used for rare cases when you are restricted to small copy areas.

CiscoSans Font Installation Guide

Any CiscoSans fonts that were installed prior to April 26, 2017 must be removed and reinstalled.

Font Version 1.004

May 2017

The CiscoSans Latin fonts, Non-Latin fonts and Web fonts are available as TrueType typefaces.

You'll need CiscoSans TrueType installed on your computer as all Cisco templates use CiscoSans TrueType fonts.

Follow the standard font installation procedure for your operating system.

How to uninstall/remove fonts Windows users

Close all open applications, then:

- 1 Access the following location: C:\Windows\Fonts.
- 2 Select all the CiscoSans font files simultaneous by holding the CTRL key + clicking the files.
- 3 Delete all the selected files.
